WM. JONES, P. C. K. R. & S.

UNROASTED COFFEE NO LONGER SOLD IN STORES UNDER GERMAN RULINGS

DRESDEN, Germany.—A novel move toward regulating the gradually decreasing coffee supply in Germany, and especially toward preventing the hoarding of coffee, has been taken by the government of Saxony. In a recent decree it forbids the sale by retailers of unroasted coffee, and makes infraction of the rule punishable by imprisonment up to six weeks, a fine up to 1,500 marks, or both. The government believes that this rule will entirely do away with coffee hoarding, since roasted coffee cannot be kept for long without losing its strength and flavor.

BOARD MEMBERS ARE DIVIDED ON OUTLET SCHEMES

Supervisors Table Puunui Matters and Proceed With Second Reading of Budget

Puunui outlet matters were laid on the table after the budget passed second reading and Beach Walk improvement went one step further at last night's meeting of the supervisors.

Supervisor Arnold, as chairman of the road committee, brought in a report recommending the adoption of Circle drive as the outlet for Puunui, as predicted in yesterday's Star-Bulletin. The report called on the city engineer to take the first steps towards pushing through actual work on the Puunui improvement work.

Several months of discussion of plans for an outlet for Puunui before the city planning commission, with the city engineer, the supervisors are familiar, and three or four trips to the district appear to have confused the members of the board and there are almost as many plans for the improvement of the district as there are supervisors.

Supervisors Arnold, Larsen and Alia have agreed to back up the plan of the city planning commission in the road committee report. Supervisor Hollinger is protesting against the change of the planning commission's recommendation from Lalmi road to Circle drive and urging the first. Supervisor Horner has a plan for the improvement of the district that he tries to explain every time Puunui comes up for discussion.

Supervisor Logan wants the city engineer to prepare an estimate of cost on the different plans and submit them to the board before a decision is made, despite the statement by Supervisor Arnold that the law will not allow the city to bear this expense. Supervisor Hatch objects to the city paying 25 per cent of the cost of the improvement in Puunui, contending that an "outlet" to the district is not of general public benefit and that the district should bear the whole expense.

With four kinds of opposition Supervisor Arnold's motion that his committee report be adopted was lost by a 4 to 2 vote. Supervisor Alia being absent. This is the first time in several months that the board has refused to back up one of its committees.

Arnold then moved that the whole matter be referred to the committee on parks, playgrounds and schools, of which Supervisor Hollinger is chairman, and his motion was lost, a motion of Supervisor Logan to lay the matter on the table, making it the business of the whole board, prevailing.

CITY FIRMS SHY ASKED TO BID ON CITY SUPPLIES

Rising Prices Make Businessmen Loath to Fix Prices in Advance

With prices on the jump every minute local merchants are loath to submit bids on materials and supplies needed by the various city departments for the coming six months and the city may have to buy in the open market until January.

This condition was revealed during a five minute conversation with H. E. Wescott, the city purchasing agent, this morning. He pointed to a stack of Manila envelopes on his desk. "Those all contain tenders that have come back without being filled out," he said. "Not half as many have come back from a firm that was low bidder on a number of our largest items in January."

He exhibited a number of letters from firms such as E. O. Hall & Son and A. B. Arleigh & Co., stating that on account of the daily change of prices in many lines it would be impossible for them to make bids for even 30 days to say nothing of 6 months.

"I expect that in many lines we will get no bids at all, and in others the bids will be so high that the supervisors will reject them," said Wescott. "In that case I shall go from firm to firm making up a price list from informal bids and changing my list as it becomes necessary. This may be the cheapest in the end, as with the present high prices it is quite likely there will be a drop in the market before the end of the year, and if the city was tied up with six months' contracts it would have to pay prices higher than the market in that case."

Bids on materials and supplies for the city's use made in accordance with a city ordinance will be opened Friday in Wescott's office.

The city attorney was instructed to take the necessary legal steps toward the formation of an improvement district from the property benefited by the proposed opening of Smith street from King to Queen street and then to proceed with the opening.

The city attorney was instructed to prepare an ordinance compelling the laying of sidewalk and curbing on Beretania street, between Fort and Nuuanu streets, and the city engineer was instructed to take steps preliminary to straightening out the same stretch of street.

MAY SET ASIDE ROUND TOP LAND FOREST RESERVE

Territorial lands on Round Top, promised by the governor as a public park, may be set aside as a forest reserve instead of being turned over to the city as park property. The board of agriculture and forestry has the proposal before it, made by the land commissioner, and will make the decision at the next meeting.

The effect will be the same—that is, a park will be established on the mountain top either way—but the territorial commission will have jurisdiction over the land instead of the supervisors under the latest scheme.

Uruguay has organized a government institute of geology with a director and assistants from the United States.

The coal in one of the largest new mines in China lies so near the surface of the ground that it will be mined with steam shovels after the covering soil is removed.

FLOW OF WATER HAS ATTENTION OF COMMISSION

Readings of the stream flow and the precipitation month by month are being taken in Hillebrand Glen by the territorial water commission, of which Territorial Hydrographer G. K. Larison is chairman.

A measurement weir was installed last month in the gully by R. C. Rice of the bureau of hydrography to measure the amount of water flowing down the stream. This work will be continued until the average flow there can be definitely ascertained and it is preparatory in character.

The plan contemplated by the commission is to bore a tunnel through the ridge, bring down the water from the gully to Reservoir No. 4 and use the water in the reservoir to furnish power for the city lighting plant, a mile or more further down Nuuanu Valley.
